

Farbod Jahan

Executive Summary

I am a product leader with 12 years in product management across platforms, data, and AI. I have led multiple 0 to 1 launches in startups from Seed to Series C and in large enterprises, with results such as \$48M in revenue impact and products used by 300M users. Across B2B, B2C, and B2B2C, I build customer centered products that feel simple and fast, supported by back end platforms, APIs and SDKs, partner and OEM integrations, device and payment enablement, security, privacy, and analytics. I lead teams with clear strategy, measurable outcomes, and tight execution, and I am open to Product Leadership opportunities across platforms, partner ecosystem, integrations, GTM systems, AI/ML and developer tools.

Professional Experience

Abbvie (Allergan Aesthetics Tech) – *Disrupting the aesthetics industry through data, design, and technology*

Oct 2024 – Present

Director of Product

- Launched 10+ AI driven features (search, personalization, chat), contributing \$48M in new revenue
